Google Cloud

Module 2 Readings: Computer Vision Fundamentals on Google Cloud

Here are the assembled readings provided in Module 2.

Module 2: Vertex AI and AutoML Vision on Vertex AI

- Lesson 1: What is Vertex AI and why does a unified platform matter?
    - [Vertex AI documentation](#)
    - [Giving Vertex AI, the New Unified ML Platform on Google Cloud, a Spin](#)
    - [cloud.google.com/training](#)
- Lesson 2: Introduction to AutoML Vision on Vertex AI
    - [AutoML documentation](#).
- Lesson 3: How does Vertex AI help with the ML workflow, part 1 ?
    - [Vertex AI Labeling Services](#)
- Lesson 4: How does Vertex AI help with the ML workflow, part 2 ?
    - [Getting evaluation metrics](#)
    - [Best Practices Guide](#)
    - [About model deployment](#)
    - [How Google does Machine Learning](#)
- Lesson 5: Which vision product is right for you ?
    - [Image of a Cloud](#)
    - [Which vision product is right for you?](#)

- Additional Resource:
    - [Machine Learning Operations (MLOps) Fundamentals course](#)
    - [Launching into Machine Learning](#)
    - [Machine Learning on Google Cloud](#)
